01 / ABOUT

Engineers who deliver from the first cable to handover.

Energico E&I specialises in Construction Management, Commissioning Management, High Voltage E&I supervision and EEHA hazardous-area inspection. With nearly 20 years of industry experience across major onshore and offshore facilities, Energico brings hands-on technical leadership, strict HSE compliance and a proven track record on some of Australia's most complex industrial and energy projects.

What we do.

■ Construction Management & Supervision	■ Commissioning Management & Supervision
■ HV Electrical & Instrumentation	■ EEHA Hazardous Area Inspections
■ High Voltage Switching & Isolation	■ Commissioning Planning, Testing & Handover
■ Technical Leadership & Client Liaison	

Depth where it counts.

■ HV switchgear, STATCOM and HV arc furnace commissioning	■ Fire & gas systems
■ Instrument air, nitrogen and water services	■ Permit to Work, LOTO and isolation management
■ Loop checks, functional testing, SATs and energisation	■ AS/NZS 3000 and AS/NZS 60079 compliance
■ Mechanical completion, punch lists and operational handover	■ LV/MV switchboards, MCCs and motor circuits
■ Fire & gas, ESD, DCS and PLC system proving	

Delivered on the ground.

PILBARA · GREEN IRON

Fortescue Green Iron Project

HV and E&I commissioning supervision across HV switchgear, STATCOM, HV arc furnace, Granshot, fire & gas, water services, instrument air and nitrogen.

HV SWITCHGEAR STATCOM

DARWIN · LNG

INPEX CPF Booster Compression

Offshore E&I execution on the Phase 2 BCM project — installation, loop checks, IR testing and commissioning support under EEHA requirements.

OFFSHORE IECEX

AUSTRALIA-WIDE · OIL & GAS

Gas turbine & compressor packages

E&I commissioning supervision of gas turbine generators and compressor packages across multiple operators, through to system handover.

GAS TURBINES VIBRATION MONITORING
